FACE

Types of Problem:

1) Angle based problem
2) Gain/Loss based problems

FACE

Minute Hand	
1 hour	360^0
1 minute	6^0

Hour Hand	
12 hours	360^0
1 hour	30^0
1 minute	0.5^0

FACE

$$\theta = 30(H) \sim \left(\frac{11}{2}\right) M$$

$$Time\ taken\ for\ one\ coincidence = 65\ \frac{5}{11}\ \text{minutes}$$

FACE

QUESTION 1:

1. There are 2 clocks. One is getting slow by 2 minutes per hour and the other one is gaining 1 minute every hour. After exactly how many hours the time shown by the 2 clocks will have a 1 hour difference?

a) 10
b) 20
c) 30
d) 40

FACE

QUESTION 2:

2. What is the angle formed by the hour hand and the minute hand at 12:30 p.m.?

a. 120^0
b. 135^0
c. 165^0
d. 180^0

FACE

QUESTION 3:

3. How many times do the hands of a clock coincide in 24 hours?

a. 20
b. 21
c. 22
d. 24

FACE

QUESTION 4:

4. If a clock gains 5 minutes every hour and it is set right at 5:00 a.m., then what is the exact time when it shows 10:00 a.m.?

a. 9:03 a.m.
b. 9:36 12/13 a.m.
c. 9:00 a.m.
d. 8:36 12/13 a.m.

FACE

QUESTION 5:

5. At what time between 6 and 7 will the hour hand and the minute hand of the clock coincide? TCS

a. 6:13
b. 6:36
c. 6:32 8/11
d. 6:35 8/11

FACE

QUESTION 6:

6. A flight from Dubai to London is scheduled to leave Dubai at 10:00 a.m. local time. London local time is 4 hours behind Dubai. The plane requires 9 hours to cover the distance. If the plane takes off 2 hours late, what will be the local time when the flight reaches London? TCS

a. 7:00 p.m.
b. 8:00 p.m.
c. 5:00 p.m.
d. 6:00 p.m.

FACE

QUESTION 7:

7. A wall clock was slow by 10 minutes. In comparison to the wall clock, a table clock was 10 minutes ahead of it. In comparison to the table clock, an alarm clock was 5 minutes behind and in comparison to the alarm clock, a wrist watch was 5 minutes fast. At noon, all the clocks were adjusted to show noon. What will be the time shown at 6:00 p.m. in the wrist watch?

a. 6:00 p.m.
b. 6:10 p.m.
c. 8:00 p.m.
d. 8:09 p.m.

FACE

QUESTION 8:

8. At what time between 4 and 5 o'clock will the hands of a watch point in opposite directions?

a. 54 minutes past 4
b. 53 7/11 minutes past 4
c. 54 8/11 minutes past 4
d. 54 6/11 minutes past 4

FACE

QUESTION 9:

9. On planet FACE, there are 10 days in a week. There are 36 hours in a day and each hour has 90 minutes while each minute has 60 seconds. As on Earth, the hour hand covers the dial twice every day. Find the approximate angle between the hands of the clock on FACE when the time is 14:40 a.m.? TCS

a. 83^0
b. 74^0
c. 129^0
d. 65^0

FACE

QUESTION 10:

11. How many palindromes are there in a clock from noon to midnight (For Example 5.45 is a palindrome)? INFOSYS

a. 52
b. 72
c. 57
d. 62

FACE

QUESTION 11:

10. How often between 11 O’ clock and 12 O’ clock are the hands of the clock together at an integral number value?

a. 55
b. 56
c. 4
d. 5

FACE

QUESTION 12:

12. What will be the time shown by a wall clock after 1234567890 hours, when at the moment, it shows the time as 11 a.m.? **WIPRO**

a. 11:00 a.m.
b. 11:00 p.m.
c. 4:00 a.m.
d. 5:00 a.m.

FACE

QUESTION 13:

13. There are sixty markings on a clock. The minute hand was exactly on one of those markings. Nine markings away from the minute hand was the hour hand. What could be the time on the clock in such a case?

a. 5:14
b. 6:20
c. 7:48
d. 3:09

FACE

QUESTION 14:

14. A plane goes from Chicago to Columbus and then comes back. It takes the same time to travel in either ways. It leaves Chicago early in the morning at 6:44 a.m. as per the local time and reaches the destination - Columbus at 8:49 a.m. as per the local time. On the same day in evening, it leaves Columbus at 4:25 p.m. as per the local time and reaches the destination – Chicago at 4:38 p.m. as per the local time. Find the time that the plane takes to travel either ways. CTS

a.1 hour 9 minutes
b. 2 hours 6 minutes
c. 1 hour 31 minutes
d. 2 hours 18 minutes

FACE

QUESTION 15:

5. In a watch, the minute hand crosses the hour hand for the third time in exactly after every 3 hours 18 minutes 15 seconds of watch time. What is the time gained or lost by this watch in one day? ACCENTURE

a. Loses 14 minutes 10 seconds
b. Loses 13 minutes 50 seconds
c. Gains 13 minutes 20 seconds
d. Gains 14 minutes 40 seconds

FACE

QUESTION 16:

16. Ram's teacher asked him to set the two hands of the clock (the hour hand and the minute hand) between 10:00 a.m. and 11:00 a.m. such that they are 8 minutes apart. What time will the clock indicate for such settings?

a. 41 9/11 minutes past 10
b. 43 9/11 minutes past 10
c. 45 9/11 minutes past 10
d. 3 3/11 minutes before 11

FACE

QUESTION 17:

17. If in a clock, the numbers 1 to 12 are replaced with alphabets starting from F (For instance F in place of 1, G in place of 2 and so on), then which of the following options shall indicate the time as 9 o'clock?

a. M:P
b. Q:N
c. P:M
d. N:Q

FACE

QUESTION 18:

18. It takes a pendulum of a clock 7 seconds to strike 4 o'clock. How much time (in seconds) will it take to strike 11 o'clock?

a. 23.33 seconds
b. 20 seconds
c. 18 seconds
d. None of the above

FACE

QUESTION 19:

19. A clock is late by 1 minute 27 seconds in a month. How much will it be late in 1 day?
INFOSYS

a. 3 seconds
b. 2.7 seconds
c. 2.9 seconds
d. 1.92 seconds

FACE

QUESTION 20:

20. In a clock having a circular scale of twelve hours, when time changes from 7:45 a.m. to 7:47 a.m., by how many degrees the angle formed by the hour hand and the minute hand changes?

a. 10^0
b. 11^0
c. 12^0
d. 15^0
