Data Sufficiency

FACE

Questions in the upcoming slides consist of a question and two statements numbered 1 and 2 given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and give answer.

a) Statement 1 alone is sufficient to answer the question
b) Statement 2 alone is sufficient to answer the question
c) Both statements taken together are sufficient to answer the question
d) Either 1 or 2 is sufficient to answer the question
e) Both the statements are together not sufficient to answer the question

FACE

Question 1

1. What is the value of x?

Statement 1: $3 < x < 5$
Statement 2: $X^2 = 16$

FACE

Question 2

Is $x > 0$?

Statement 1: $-2x < 0$
Statement 2: $x3 > 0$

FACE

Question 3

How many ewes (female sheep) in a flock of 50 sheep are black?

Statement 1: There are 10 rams (male sheep) in the flock.
Statement 2: Forty percent of the animals are black.

FACE

Question 4

Is the length of a side of equilateral triangle E less than the length of a side of square F?

Statement 1: The perimeter of E and the perimeter of F are equal.
Statement 2: The ratio of the height of triangle E to the diagonal of square F is $2\sqrt{3} : 3\sqrt{2}$.

FACE

Question 5

If a and b are both positive, what percent of b is a?

Statement 1: $a = 3/11$
Statement 2: $b/a = 20$

FACE

Question 6

Is z an even number?

Statement 1: 5z is an even number.
Statement 2: 3z is an even number.

FACE

Question 7

When did Santosh reach the college?

Statement 1: Santosh's college is 10 KM away from his home.
Statement 2: Santosh was going at the speed of 40 KM/hr.

FACE

Question 8

Two socks are to be picked at random from a drawer containing only black and white socks. What is the probability that both are white?

Statement 1: Probability of the first sock being black is 1/3.
Statement 2: There are 24 white socks in the drawer.

FACE

Question 9

A wheel of radius 2 meters is turning at a constant speed. How many revolutions does it make in time T?

Statement 1: T = 20 minutes.
Statement 2: The speed at which a point on the circumference of the wheel is moving is 3 meters per minute.

FACE

Question 10

Are the integers x, y and z consecutive?

Statement 1: The arithmetic mean (average) of x, y & z is y.
Statement 2: y-x = z-y

FACE

Question 11

In a running race, consist of four participants A, B, C and D, who finishes last?

Statement 1: A beats B, C and D by 100m, 60m, and 40m respectively.
Statement 2: B beats C and D by 20m and 10m respectively

FACE

Question 12

A certain straight corridor has four doors, A, B, C and D (in that order) leading off from the same side. How far apart are doors B and C?

Statement 1: The distance between B and D is 10 meters.
Statement 2: The distance between A and C is 12 meters.

Question 13

Fifty percent of the articles in a certain magazine are written by staff members. Sixty percent of the articles are on current affairs. If 75 percent of the articles on current affairs are written by staff members with more than 5 years experience of journalism, how many of the articles on current affairs are written by staff members with more than 5 years experience?

Statement 1: 20 articles are written by staff members.
Statement 2: Of the articles on topics other than current affairs, 50 percent are by staff members with less than 5 years experience.

FACE

Question 14

At what time did Sonali leave her home for office?

Statement 1: Sonali received a phone call at 9.15 a.m. at her home.
Statement 2: Sonali's car reached office at 10.15 a.m., 45 minutes after she left her residence.

FACE

Question 15

Is $x = -11$?

Statement 1: $x^2 = 144$
Statement 2: x is a natural number.
