Question 1

A person goes from A to B which is 2 kilometers away, turns right and walks for 3 kilometers until he reaches C. she turns right and walks for 8 kilometers to reach D. She again turns right and walks 3 kilometers to reach E. Further, she turns right and walks for 4 kilometers to finally arrive at F. How far is A from F?

FACE

Conditions 2

P % Q – P is north of Q. P # Q – P is south of Q.
P @ Q – P is east of Q. P$ Q – P is west of Q.
P * QR – P is midpoint of vertical straight line QR. P€ QR – P is midpoint of horizontal straight line QR.
If Bus honks once – It means bus turns left. If Bus honks twice – It means bus turns right.
J is 20m@B. C is 33m#J. C is 15m$D. D * EF. E is 30m%F. F is 40m@G. H is 24m%G. K is 10m@H. Gate X is 18m%B.

FACE

Conditions

Question 2

A bus takes passengers from E and drives 31 m north. It honks once and drives 35 m. In order to reach X, it should drive ____?

A) 5 m

B) 10 m

C) 15 m

D) $5\sqrt{2}$ m

FACE

Question 3

A man walks 40m towards north and he turns his left and walked 40m. He then turns his left and walked 15m. He finally turns his right and walked 20m. What is the distance he is from starting point and in which direction?

A) 55m , Northwest

B) 36m, Northeast

C) 65m, Southeast

D) 65m, Northwest

E) None of these

FACE

Instruction 4-5

Directions for 4 to 5: Study following information to answer the given questions.
L, B, N, D, E, F and R are seven friends standing at different places. N is 5m to the east of L and 4m to the North of B. D is 13m to the east of L. R is 8m to the west of B. E is 5m to the south east of B and 4m east of F. If E goes 7 m North he will be exactly in the middle of N and D.

FACE

Instructions

Question 4

What is direction of F with respect to N?

A) North east

B) South west

C) North

D) South

E) None of these

FACE

Instructions

Question 5

What is direction of L with respect to E?

A) North east

B) North west

C) South east

D) South west

E) None of these

FACE

Instruction 6

Directions for 6: Study the following information carefully and answer the questions that follow.

A country has the following types of traffic signals.

3 green lights = go at 60 kmph speed, 2 green lights = go at 40 kmph speed

1 green light = go at 20 kmph speed,3 red lights = stop, 2 red lights = turn left, 1 red light = turn right.

A person starts driving from a point in West direction and he encounters the following traffic signals:

Starting point – 1 green light;

After 15 minutes, 1st signal – 2 red & 2 green lights;

After 24 minutes, 2nd signal – 1 red & 3 green lights;

After 45 minutes, 3rd signal – 1 red & 2 green lights;

After 18 minutes, 4th signal – 3 red lights.

FACE

Instructions

Question 6

Find the total distance he covered up to the last signal.

A) 76 km

B) 78 km

C) 70 km

D) 75 km

E) 79 km

FACE

Question 7

Airplanes A, B, C and D started flight towards east. After flying 125 km planes A and D flew towards right while planes B and C flew towards left. After 115 km, planes B and C flew towards their left while planes A and D also turned towards their left. In which directions are the airplanes A, B, D, C respectively flying now?

A) North, South, East, West

B) East, West, West, East

C) East, West, East, West

D) South, North, North, South

E) None of these

FACE

Question 8

Arya and Bindya start from a point simultaneously. Arya moves to his East and travels 12 km, and Bindya moves to her south and travels 12 km. Arya takes a 270° anti-clock wise turn and travels 12 km. Bindya takes a 90° clock wise turn and runs 18km. Then Bindya goes 30km in same line in exactly opposite direction. Which of the following is true regarding their positions?

A) Bindya has travelled 30 km more than Arya

B) Both are to the south east of original position

C) Both are at the Different point

D) None of these

FACE

Instruction 9-10

Directions for 9 to 10: Study the information given below carefully and answer the questions that follow.

A is 20m away from C in east direction. B is standing in south of A and is facing south direction and distance between A and B is 30m. Now to the right of B, covering 32m towards west, D is standing. D is eating ice-cream standing on it position and facing north. After eating ice-cream D starts moving towards south-east direction covering 13m and reaches to the position of E.

FACE

Instructions

Question 9

What is the distance between D and C and C is in which direction with respect to D?

A) 31m, north-east

B) 29m,north-west

C) 32.3m, north-east

D) 40m, north-west

E) Cannot be determined

FACE

Instructions

Question 10

In which direction C is with respect to B?

A) North-east

B) South-west

C) South

D) North-west

E) None of these

Instruction 11-12

Directions for 11 to 12: Study the information given below carefully and answer the questions that follow.

A man walks 8m towards east to reach point P. He turns to his right and walks 5m to reach point Q. Then, he turns to his left and walks 9m to reach point R and he turns to his right and walks 11m to reach point S. Finally he turns to his right and walks 20m to reach point T.

FACE

Instructions

Question 11

If a man walked 3m towards east from point T to reach point U, then what is the distance between point U and starting point?

A) 16m

B) 25 m

C) 22 m

D) 33 m

E) None of these

FACE

Instructions

Question 12

What is the distance between starting point and Q?

A) 13m

B) 9m

C) Sqrt(89) m

D) Sqrt(243) m

E) None of these

FACE

Instruction 13-15

Directions for 13 to 15: Study the information given below carefully and answer the questions that follow.

Two buses, F and G starts from their respective terminals D and H respectively. F goes 4 km north before turning right and travelling 6 km east to reach city T. From there it goes 3 km north then turns left and travels 4 km more to finally stop at city U. Bus G starts from terminal H goes 9 km north to reach city S. From there it turns left to travel 4 km more before turning south and travelling 2 km more to reach city A. Terminal H is 10 km to the east of terminal D.

FACE

Instructions

Question 13

According to the route map, which city they both have to cross?

A) T

B) U

C) A

D) S

E) None of these

FACE

Instructions

Question 14

If bus P is standing 2 km to the west of terminal point H, what is distance between point D and bus P?

A) 8 km

B) 7km

C) 19km

D) 9km

E) None of these

FACE

Instructions

Question 15

What is total distance covered by the bus F?

A) 15

B) 17

C) 13

D) 19

E) None of these

FACE

Instruction 16-18

Directions for 16 to 18: Study the information given below carefully and answer the questions that follow.

A boy starts from A walks 3km north, turns east and walks 3km. He then turns south and walks 2km. He then turns east and walks 4km more. Finally he turns south and walks 6km and reaches B, after which he stops.

FACE

Instructions

Question 16

In which direction is the boy with respect to his starting point?

A) South

B) South east

C) North

D) North west

E) None of these

FACE

Instructions

Question 17

What is the total distance walked by the boy?

A) 18

B) 14

C) 12

D) 20

E) None of these

FACE

Instructions

Question 18

How far is the boy from the starting point?

A) 8 km

B) 6.67 km

C) 8.60 km

D) 9.21 km

E) None of these

FACE

Instruction 19-21

Directions for 19 to 21: Study Read the following information carefully and answer the questions which follow:

Point A is 3m to the east of point B. Point B is 9m south of point D. Point B is exactly midway between point A and point X. Point E is 8m the south of point B. Point N is 6m to the south of point X. Point H is exactly midway between point X and point N.

FACE

Instructions

Question 19

What is the distance between X and D?

A) $\sqrt{88}$m

B) $\sqrt{89}$m

C) $\sqrt{90}$m

D) $\sqrt{91}$

E) None of these

FACE

Instructions

Question 20

If a person walks 9m towards north from point E, which of the following points would he cross?

A) B

B) H

C) N

D) X

E) None of these

FACE

Instructions

Question 21

If a person walks 9m towards South from point D and turns right and walks 2m, then It will be between which of the points and how far will he be from point A?

A) X and H, 9m

B) D and E, 8m

C) X and A, 7m

D) X and B, 5m

E) None of these

FACE

Instruction 22-24

Directions for 22 to 24: Read the given information and answer the questions which follow:

Raman starts walking from his home. He walks to the east for 10 kilometers to reach the gym and in the midway he passes a shop. If he returns to the shop and walks to the south for 3 kilometers he reaches a temple. If at the temple he turns to the right and walks 2 kilometers, he reaches the college. But if he walks 5 kilometers to the southwest of the temple, he reaches a pond. From the pond, he walks 16 kilometers to the east to reach the stadium. There is a pool 5 kilometers to the northwest of the stadium. Distance between pool and Temple is 10 km. If he walks 5 kilometers to the south from the pond, he reaches the park. At the park, if he turns to the left and walks 5 kilometers he reaches his father's office.

FACE

Instructions

Question 22

Raman’s Home is at which direction with respect to his father’s office?

A) North

B) South

C) North-East

D) North-West

E) None of these

FACE
