Problems on Trains

FACE

Question 1

A train passes an electric pole in 10 seconds and a platform 120 m long in 18 seconds. What is its length in metres?

A) 130 m

B) 150 m

C) 180 m

D) 240 m

FACE

Question 2

There are two trains running on two parallel tracks. Length of each train is 120 m. When they are running in opposite directions, they cross each other in 4 seconds and when they are running in the same direction they cross in 12 seconds. What is the speed of the faster train?

A) 72 km/h

B) 80 km/h

C) 120 km/h

D) 144 km/h

FACE

Question 3

Two identical trains A and B running in opposite directions with equal speeds take 2 minutes to cross each other completely. The number of bogies of A is increased from 12 to 16. How much more time would they now require to cross each other?

A) 40 s

B) 50 s

C) 60 s

D) 20 s

FACE

Question 4

Two stations A and B are 110 km apart on a straight line. One train starts from A at 7 a.m and travels toward B at a speed of 20 kmph. Another train starts from B at 8 a.m and travels toward A at a speed of 25 kmph. At what time will they meet ?

A) 9 am

B) 10 am

C) 11 am

D) None of these

FACE

Question 5

Kanyakumari Express is a daily train from Kashmir to Kanyakumari. The train leaves Kashmir at 11 a.m everyday and reaches Kanyakumari after exactly 10 days at 11 a.m. Kashmir express is a similar daily train which leaves Kanyakumari at 11 a.m everyday and reaches Kashmir after exactly 10 days at 11 a.m. Let us say, you are on the train which is leaving Kashmir on 20th April. When you reach Kanyakumari on 30th April, how many Kashmir express trains would have crossed you from the opposite direction?

A) 19

B) 10

C) 9

D) None of the above

FACE

Question 6

A train approaches a tunnel AB. Inside the tunnel is a cat located at a point that is 3/8 of the distance AB measured from the entrance A. When the train whistles, the cat runs. If the cat moves to the entrance of the tunnel A, the train catches the cat exactly at the entrance. If the cat moves to the exit B, the train catches the cat exactly at the exit. The speed of the train is greater than the speed of the cat by what order ?

A) 3:1

B) 4:1

C) 5:1

D) None of these

FACE

Question 7

Awadh express and Bokaro express start simultaneously from lucknow and Jamshedpur towards each other and continuously shuttle between these two places every time these trains meet each other, they turn back after exchanging their respective speeds, the initial ratio of their speeds is 2:1.Let these two trains first time meet at Patna, then what is the ratio of distances covered by Awadh express and Bokaro express till they meet for the third time at the same place?

A) 1:1

B) 14:13

C) 10:11

D) None of these

FACE

Question 8

A goods train leaves a station at a certain time and at a fixed speed. After 6 hours, an express train leaves the same station and moves in the same direction at a uniform speed of 90 km/hr. If this train catches up the goods train in four hours, then what is the speed of the goods train?

A) 26 kmph

B) 37 kmph

C) 42 kmph

D) 36 kmph

FACE

Question 9

Arjun is standing on an old building and there is a railway track beside on which a train travels at a speed of 72 kmph. When the train passes by the building, Arjun tries to jump inside the train. He somehow manages to enter the train through the last door of the last bogie. After jumping in, he runs towards the other end of the train at a speed of 36 kmph. When he reaches a distance of 300 m from the building , the building exploded. After how many seconds since Arjun's jump did the building explode?

A) 30 s

B) 10 s

C) 15 s

D) 20 s

FACE

Question 10

Two trains, each 150 m long, moving in opposite directions, cross each other in 6 seconds. If one moving twice as fast as the other, then the speed of the faster train is:

A) 180 kmph

B) 120 kmph

C) 150 kmph

D) 136 kmph

FACE

Question 11

The distance between Vijayawada and Chennai is 500km. A train travels from Vijayawada to Chennai at 60 kmph and returns at 40 kmph to Vijayawada. What is its average speed for the entire journey (approximately)?

A) 48 kmph

B) 64 kmph

C) 72 kmph

D) 45 kmph

FACE

Question 12

Standing inside a train exactly at one of its end points, Kiran noticed a flag outside the train exactly near the other end of the train. As the train started to move at a speed of 120 m/s, Kiran also started running inside the train in the same direction as that of the train at a speed of 30 m/s. If he takes 10 seconds to reach the other end
of the train, after how much time from the start he would have crossed the flag?

A) 5 s

B) 4 s

C) 2 s

D) 3 s

FACE

Question 13

A train which is travelling at a constant speed crosses a lamp post in 9 seconds and it takes 13.5 seconds to cross a platform 99 m long. Find the length of the train. WIPRO

A) 99 m

B) 198 m

C) 135 m

D) 12 m

FACE

Question 14

Two bullet trains of length 200 m and 160 m take a minute to cross each other while travelling in the same direction and take only 10 seconds to cross each other when they travel in opposite directions. What are the speeds at which the bullet trains are travelling?

WIPRO

A) 21 m/s; 15 m/s

B) 30 m/s; 24 m/s

C) 18 m/s; 27 m/s

D) 15 m/s; 24 m/s

FACE

Question 15

A goods carriage of length 2 km headed to Jaipur from Punjab at a speed of 30 km/h. Find the time taken by the goods carriage to cross a tunnel of length 58 km. MPHASIS

A) 4 hours

B) 3 hours

C) 2 hours

D) 1 hour
