Problems on Ages

FACE

Problems on Ages

1) If the current age of a person be X, then

- age after n years = X + n
- age n years ago = X – n
- n times the age = nX
- If ages in the numerical are mentioned in ratio A : B, then A : B will be AX and BX.

FACE

Problems on Ages

2) If sum of ages of x and y is A and ratio of their ages is p : q respectively, then u can determine age of y by using the formula shown below:

$$\text{Age of y} = \frac{\text{Ratio of y}}{\text{Sum of ratios}} \times \text{sum of ages}$$

$$\text{Age of y} = \frac{q}{(p+q)} \times A$$

FACE

Problems on Ages

Points to Remember:

- After reading the question, assume unknown age by some variable x.
- Convert the statements in the question into mathematical equations.
- Calculate the unknown by solving the equations and the obtained value must satisfy the conditions given in the problem.

Question 1

Dinesh is younger to Roshan by 9 years. If their ages are in the respective ratio of 4:5, how old is Dinesh?

A) 36 years

B) 23years

C) 29 years

D) Cannot be determined

FACE

Question 2

The ratio of the present ages of Pranav and Qureshi is 4:5. Five years ago, the ratio of their ages was 7:9. Find their present ages. (In years)

A) 40, 50

B) 16, 20

C) 48, 60

D) 20, 25

FACE

Question 3

A is 20 years older than B. In five years, A's age will be twice the age of B. The present age of B is _____.

A) 15 years

B) 6 years

C) 7 years

D) 8 years

FACE

Question 4

Saransh is 50 years old and Nazma is 40 years old. How long ago was the ratio of their ages 3:2?

A) 20 years

B) 30 years

C) 40 years

D) 25 years

FACE

Question 5

One year ago, Mano was 4 times as old as his daughter. Now his age is square of his daughter's age. Find the age of Mano.

A) 9 years

B) 17 years

C) 11 years

D) 15 years

FACE

Question 6

The ages of Vijay and Ajith are in the ratio 1 : 3. Ten years hence, the ratio of their ages will be in the ratio 2 : 5. Find the present age of Vijay.

A) 20

B) 30

C) 40

D) 50

FACE

Question 7

The sum of the present ages of A and B is 30 years. Six years ago, A's age is 5 times B's age. What is the present age of B?

A) 9 years

B) 21 years

C) 18 years

D) 27 years

FACE

Question 8

A man is 24 years older than his son. In two years, his age will be twice the age of his son. The present age of his son is _____.

A) 18 years

B) 14 years

C) 22 years

D) 20 years

FACE

Question 9

A is two years older than B, who is twice as old as C. If the sum of the ages of A, B and C is 27, then how old is B?

A) 7

B) 8

C) 9

D) 10

FACE

Question 10

The ratio of ages of Akshat, Prateek, Sandeep and Anton is 7 : 9 : 10 : 13. The eldest is 12 years older than the youngest. What is the age of Sandeep 5 years from now?

A) 30

B) 35

C) 25

D) 20

FACE

Question 11

Ten years ago, Priya’s mother's age was four times that of her daughter. 10 years hence, the mother's age will be twice that of Priya. Then the present age of Priya is _____.

A) 25

B) 20

C) 15

D) 18

FACE

Question 12

Father is four times the age of his daughter. If after 5 years, he would be threee times of daughter's age, then further after 5 years, how many times he would be of his daughter's age?

A) 1.5 times

B) 2 times

C) 2.5 times

D) 3 times

FACE

Question 13

What is Aman's present age, if after 20 years his age will be 10 times his age 10 years back?

A) 6.2 years

B) 7.7 years

C) 13.3 years

D) 10 years

FACE

Question 14

One year ago, the ratio of Honey and Piyush ages was 2: 3 respectively. After five years from now, this ratio becomes 4: 5. How old is Piyush now?

A) 5 years

B) 25 years

C) 10 years

D) 15 years

FACE

Question 15

A man said to his son, "I was one-third of your present age when you were born". If the present age of the man is 84 years, find the present age of the son.

A) 45.7 years

B) 28 years

C) 59.3 years

D) 63 years
